| | <ul style="list-style-type: none">• Developed and maintained web applications using PHP Codeigniter, HTML, CSS, JavaScript, and Bootstrap.• Conducted database management tasks, including database design, optimization, and maintenance using MySQL.• Wrote APIs in Codeginter to enable seamless data exchange between front-end and back-end systems. | |

01/2022 – 10/2023

Web Developer

Ahmednagar

AppSchedio Corp.

- Developed and maintained web applications using PHP Laravel, HTML, CSS, JavaScript, and Bootstrap.
- Collaborated with cross-functional teams to gather and analyze project requirements, ensuring the delivery of high-quality products.
- Designed and implemented responsive and user-friendly front-end interfaces.
- Utilized Express JS to build efficient and scalable server-side components.
- Created custom WordPress themes and plugins for various clients.
- Wrote APIs in Express JS to enable seamless data exchange between front-end and back-end systems.
- Conducted database management tasks, including database design, optimization, and maintenance using MySQL.
- Employed Git and GitHub for version control and collaborative development.
- Tracked project progress and issues using Jira, ensuring timely resolution and project deliver

Projects

Selexic Pay HRMS

Admin Panel and API Development

- **Admin Panel Development:**

- Utilized PHP CodeIgniter to create a feature-rich admin panel with a user-friendly interface, enabling easy navigation and administration of HR tasks.
- Implemented responsive design principles to ensure optimal viewing experience across devices, enhancing accessibility for users.
- Designed and integrated modules for employee management, payroll processing, attendance tracking, leave management, and other HR functions, providing a comprehensive solution for organizational needs.
- Incorporated advanced security measures to safeguard sensitive employee data and ensure compliance with data protection regulations.

- **API Development for Selexic Pay Flutter App:**

- Developed APIs in PHP CodeIgniter to facilitate seamless communication between the Selexic Pay HRMS Admin Panel and the Flutter-based mobile application.
- Designed RESTful APIs to enable smooth data exchange, allowing the Flutter app to retrieve and manipulate HR-related information securely.
- Collaborated closely with the mobile app development team to understand requirements and effectively integrate API endpoints, ensuring compatibility and synchronization between the admin panel and the mobile app.

Genricplus Pharmacy

API and Website Development

- Developed a responsive website using HTML, CSS, JavaScript, and Ajax to cater to the needs of Genricplus Pharmacy.
- Implemented APIs in Express JS to facilitate seamless data exchange, ensuring efficient communication between the front end and back end.
- Enhanced user experience by incorporating dynamic product filtering and search functionality, allowing users to easily find desired items.
- Ensured cross-browser compatibility and optimized performance for a smooth browsing experience across various devices.

MakeUCA Web

WebApp Development

- Designed and developed a comprehensive web application using HTML, CSS, JavaScript, Ajax, PHP Laravel, and MySQL for MakeUCA.
- Implemented Bootstrap framework for responsive design, ensuring optimal viewing experience across devices.
- Created an intuitive content management system (CMS) tailored for authors and administrators, enabling easy content creation, editing, and management.
- Utilized RESTful APIs for seamless data retrieval and manipulation, enhancing the scalability and flexibility of the application.
- Conducted thorough testing and debugging to ensure the application's reliability, security, and performance met industry standards.

Factory Fresh

Admin Panel Development

- Developed an efficient admin panel using HTML, CSS, JavaScript, Ajax, PHP Laravel, and MySQL for Factory Fresh.
- Employed Bootstrap framework to create a user-friendly interface for easy navigation and management of administrative tasks.
- Designed and implemented a robust content management system (CMS) tailored for authors and administrators, facilitating seamless content creation, editing, and publishing.
- Integrated RESTful APIs to enable smooth data retrieval and manipulation, ensuring efficient communication between the front end and back end systems.
- Conducted rigorous testing and optimization to guarantee the admin panel's functionality, security, and performance met client requirements and industry standards.

Front End Websites Development

- Tricon Infra
- Genricplus Pharmacy India LTD
- Team57 Pride
- Anand Construction
- Lokflix
- Appschedio
- Ahmednagar Zilha Parishad
