Experience

Dream Stage

Oct 2025 – Present

Founder Backend

Remote

- Developed API routes and authentication using typescript for onboarding platform at Dream Stage.
- Contributed to core engineering tasks, including feature development and scraped data from instagram, bookmyshow for lead generation.
- Ran cron Job integrated with Events platform to display on main website.

FICO

July 2024 – May 2025

Developer Associate

Bengaluru, Karnataka

- Developed an interactive UI design to allow users generate scoring models with React and Tailwind managing components with redux.
- Owned 15+ API routes in the Backend with Node and supported profile based middleware functions.
- Wrote and Improved existing templates in Python with object oriented structure and unit test cases ensuring faster processing by 3x.
- Managed IAM roles and policies for 10+ AWS resources, improving permission control.

Projects

Blog App | MERN, React Hooks, Redux-Toolkit, Nodemailer, OAuth

github.com/shiwanshurahul/Blog_APP

- Created an Industry standard scalable MERN application, with Stripe payment integration, Pagination, Filtering and JWT + OAuth authentication.
- Mounted 20+ routes for all components including Login, Create post, Like or dislike post and notify followers via gmail.
- Designed light theme layout with tailwind CSS, formik and custom styled classes.
- Engineered efficient state management by 5x making in use of React Hooks and Redux Toolkit.
- Increased 30% performance boost with code splitting, lazy loading and image optimization techniques.

Linkedin Clone Website | React, Frontend, Firebase

github.com/shiwanshurahul/Linkedin_clone

- Developed a responsive Linkedin clone in React with 3+ core features like user posts, image uploads and real-time feed.
- Enabled secure Firebase + OAuth authentication and structured upload pipeline.
- Fetched data from local storage and browser cookies.

Ride Delivery App | Fullstack, Axios, Socket.io, Cursor

github.com/shiwanshurahul/UberClone

- Created a Fullstack application with MVC architecture and role based access (Ride-captain, user) with JWT security.
- Designed 25+ RESTful APIs to apply CRUD operations, verified results via Postman.
- Implemented live location access with google maps and secure chatting option with Socket.

Education

KIIT University

B.Tech, Computer Science

September 2020 – June 2024

Bhubaneswar, Odisha

Mahatma Gandhi Shikshan Sansthan

Higher Secondary, Science

March 2018 – April 2020

Darbhanga, Bihar

Certifications

- Completed 24 hours MERN Stack Udemy course by MasynTech Coding School.
- Solved over 550 problems on LeetCode and GeeksforGeeks in C++ programming language.
- Earned AWS cloud practitioner semester-1 certificate.
- Worked on 3+ top-notch Full Stack projects.
