

BIKASH KUMAR MAHALDAR

Ameerpet | Hyderabad, Telangana, 500016

bkbikas0@gmail.com | 6201560760 | [Bikash LinkedIn](#) | [Bikash Github](#)

Professional Summary

Detail-oriented and motivated **Java Developer** with strong skills in **Java, Spring Boot, JSP, Servlets, React, and Oracle Database**. Experienced in building **secure, scalable web applications** through academic projects and hands-on internship work. Skilled in **REST API development, JDBC operations**, and **full-stack web application** flow. Strong **problem-solving** abilities with experience solving **200+ coding challenges** on LeetCode and HackerRank. Committed to writing **clean, efficient code** and contributing effectively to a development team.

Education

Bachelor of Technology in Computer Science and Engineering

Jharkhand University of Technology, Palamu, Jharkhand

October, 2021 – June, 2024

CGPA: 6.78 / 10

Technical Skills

- **Core Skills:** Java • Spring Boot • JSP • Servlets • JDBC • SQL • REST APIs
 - **Frontend:** HTML • CSS • JavaScript • React
 - **Tools:** Maven • Eclipse • Git • GitHub • Postman
 - **Database:** Oracle
 - **Concepts:** OOP • Collections • Stream API • MVC Architecture
-

Academic Projects

1. Secure Bank Management System

Technologies: Java, JSP, Servlets, Oracle Database

- Developed a secure web-based banking application for customer registration, account creation, balance check, deposits, withdrawals, and fund transfers.
- Implemented **authentication, session management, and role-based access** to protect sensitive banking operations.
- Designed and executed **CRUD operations** for customer and account modules using JDBC with Oracle Database.
- Built JSP-driven UI for smooth user interaction and Servlets for backend processing.
- Ensured data integrity and enhanced security using **input validation, encrypted password storage**, and controlled access flows.
- Optimized queries and improved overall system reliability and performance.

2. Online Electronic Store

Technologies: Java, JSP, Servlets, Oracle Database

- Developed a web-based application for browsing, purchasing, and managing electronic products such as mobiles, laptops, and accessories.
- Implemented **user registration, login, product listing, cart management, and order placement** features.
- Performed **CRUD operations** for products, users, and orders using JDBC with Oracle Database.
- Built dynamic JSP pages for product display and Servlets for backend processing and business logic.

- Added **admin panel** for product management (add/update/delete) and order tracking.
 - Ensured smooth user experience with proper validation, secure data handling, and optimized database queries.
-

Internship Experience

Java Developer Intern – Naresh I Technology, Hyderabad, Telangana

February, 2025 – Present

- Assisted in developing and testing Java-based web applications.
 - Collaborated with senior developers to debug and optimize code.
 - Gained hands-on experience with Spring Boot and RESTful API integration.
-

Certifications

- Java Programming – HackerRank
 - Database Management with SQL – HackerRank
 - Spring Framework – Naresh i Technologies
-

Achievements

- Solved 200+ coding problems on platforms like LeetCode and HackerRank.
 - Participated in inter-college hackathons and coding competitions.
-

Soft Skills

- Problem Solving
 - Team Collaboration
 - Time Management
 - Adaptability
 - Communication
-
