To leverage my skills and experience contributing to the success of company by delivering high-quality work, driving innovative solutions, and consistently achieving project goals. I aim to continually develop my expertise, stay updated with industry trends, and create impactful results that align with the organization's vision and objectives.

EXPERIENCE

2023 - PRESENT

White Code Technology Solutions Pvt. Ltd

UI-UX Developer.

PROJECTS

WhiteCode PVT.LTD.

Spark ETL-Tool (InWorking):

Languages and Technologies : React JS, Nest JS, CSS, Python, Bootstrap, Postgresql...

- Leveraging Apache Spark's powerful ETL capabilities, I focus on creating an intuitive and efficient UI that facilitates seamless interaction with the tool.
- In that include designing and implementing user-friendly interfaces for extracting,transforming, and loading data.
- SparkETL is an framework running on top of Apache Spark, which enables developers to create ETL Jobs by creating json configurations and run them using Apache Spark.
- Basic phylosophy behind this project is to enable developers to focus on business logic rather than writing boiler plate code for spark jobs.

college website development (InWorking):

Languages and Technologies : Html , CSS , Bootstrap , Javascript , Php, mysql

- This project aims to develop a dynamic and responsive college website using a combination of HTML, CSS, Bootstrap, JavaScript, PHP, and MySQL. The website will feature a CMS (Content Management System) for admin control, allowing college staff to manage content efficiently. The dynamic aspects of the website will provide students, faculty, and visitors with real-time information and interactive features.

Personal Project's :

Organic Food

Languages and Technologies : Html , CSS , Bootstrap , Javascript

- The "Organic Food" website is designed to promote and sell organic food products. The website is visually appealing, user-friendly, and fully responsive, ensuring a seamless experience across all devices. The site provides detailed information about the benefits of organic foods, showcases a variety of products, and includes an e-commerce section for users to purchase items directly.
