SUMMARY

Results-driven and detail-oriented Web Developer with a proven track record of success in Laravel and PHP development. Over the past two years, I have honed my skills in creating efficient and scalable web applications, specializing in backend development, frontend design, and database management. Proficient in implementing secure authentication systems, building and consuming APIs, and ensuring the reliability of code through comprehensive testing. Adept at collaborating with cross-functional teams to deliver high-quality solutions. Eager to contribute expertise and passion for web development to a dynamic team.

EXPERIENCE

Web Developer

Saral Infosoft

2021 - Present Thane Maharashtra

Developed and maintained robust web applications using Laravel and PHP, contributing to the successful execution of various projects.

- Played a key role in designing and implementing responsive and user-friendly frontend interfaces using HTML, CSS, and JavaScript, ensuring a seamless user experience.
- Created react.js Single page and multi page websites.
- Collaborated with cross-functional teams to gather and analyze project requirements, providing technical insights and contributing to project planning and execution.
- Worked extensively with MySQL to design and optimize database schemas, ensuring efficient data storage and retrieval for web applications.
- Implemented secure authentication and authorization systems, enhancing the overall security posture of web applications.
- Integrated third-party APIs and services to extend the functionality and features of web applications.
- Conducted thorough testing of codebase, identifying and resolving bugs and issues to ensure the delivery of high-quality, reliable software.
- Demonstrated flexibility and adaptability by successfully working on multiple projects simultaneously, meeting tight deadlines, and adapting to changing project requirements.
