PROJECT

Project name- Maruti Suzuki Insurance Broking

Client name- Maruti Suzuki, Japan

Description

- Client existing website is not appealing as per
- expectations and it is not user-friendly in the global
- market. They want to improvise payment methods as
- per latest technology. And they want to add few options
- related to insurance domain.
- I worked as per client expectations and completed the
- project using the latest angular version.

Roles and Responsibilities

- 1.Developed and implemented a new Angular version14-based dashboard for a client, resulting in increase in user engagement and increase in customer satisfaction.
- 2.Client provided figma structured converted in angular using html, css and angular.
- 3.Used templates, directives, components, services, data binding and routing. And also used decorators.
- 4.Helped team members to fixing the bugs and improving the product.
- 5.Coordinated with project manager and submitted project status on weekly basis
- 6.Made changes in project as per client requirement.
- 7.Gave my suggestions to improvise the website and make it more attractive.

PROJECT

Project name- Helbacks

Client name- HGS Holding, USA

Domain : E-commerce domain

Description

- Their website is not overwhelming and you can easily
- navigate through it. That makes a lot of sense considering
- that their market is adults who do not have the luxury of
- time to browse. That's a great technique you can use as
- well. Always understand the behavior of your audience
- and pattern your website design from there.

Roles and Responsibilities

- Discuss and clarify requirements provided by the Product Manager.
- Involved in requirement gathering sessions and developing web applications using Agile Methodology.
- Design the Solution with Web Services .
- Extensively used Debugging TypeScript Using Chrome Developer Toolbar.
- Design UI with web technologies provided by UX team.
- Integrate Front end with endpoints exposed by web services.
- Worked on highly advanced UI design & Responsible for developing the UI pages using HTML, CSS, JavaScript, Angular, Bootstrap.

DECLARATION

I do hereby declare that all the information given above is true to the best of my knowledge and belief.
