Project Details

BE Project –Freelancer Activity Management System

In existing system to overcome this problem we came with a system that can calculate the formula for how much time you were active in the given task.

The formula we have use in our system is that calculating the activity level and time covered by individual on that basis the payment is given to the employees.

Every accurately payment is done to the employees it is every benifical for the company this formula is making the profit of company.
