Digital Hr

Jul 2021 - Jul 2021

To complete project using java jsp and servlet and work in frontend to backend

Hotel booking management system

Jun 2024 - Present

A hotel booking management system is a comprehensive software solution designed to streamline the operations of a hotel, from room reservations to guest check-ins and check-outs. Here's a detailed description of the various components and functionalities typically included in such a system:

Online Reservations: Allows guests to book rooms directly from the hotel's website or through integrated third-party platforms (e.g., Booking.com, Expedia).

Room Availability: Real-time updates on room availability, ensuring accurate inventory management.

Rate Management: Dynamic pricing strategies based on demand, season, and occupancy levels.

SKILLS
