

# DURGESH DHARMADHIKARI

Software Developer

Experienced Software Developer with approximately 3 years of expertise in both frontend and backend development, specializing in Laravel, PHP, Angular, Node.js, Spring Boot, VB, Asp.Net, .Net Core, and MVC. I am seeking remote roles or opportunities that combine remote work with in-office collaboration, where I can contribute to innovative projects. I have a proven track record of delivering high-quality code on time, leading small teams, and fostering effective communication. I am excited about opportunities that allow for a global impact while embracing flexible work environments.

## WORK EXPERIENCE

### Sr. Software Developer

Portalwiz Technologies Pvt Ltd Pune, MH.

June 2021  
-March 2024

- In the last couple of years, I've delved into various technologies, having skills in both frontend and backend development. I specialize in Laravel, Angular, and Node.js, along with experience in NEXT.js. On the backend, I've worked with Node (Express.js), PHP, Java, Spring Boot, Asp.Net, and MySQL. I've deployed projects on shared hosting and cloud platforms like GCP and AWS. Additionally, I'm proficient in Bootstrap, SCSS, Tailwind CSS, MUI, etc., and capable of creating WordPress websites.
- Skillsets:** Laravel, PHP, Angular, Node.js, Spring Boot, VB, Asp.Net, .Net Core, MVC.
- Over the past year, I served as a technical team lead, managing multiple projects simultaneously. **The main projects I've undertaken include Learning Management Systems (LMS), CRMs, and content management software like mini-WordPress.** Additionally, I've developed various client specific CRMs.
- Beyond development, I am well-versed in version control systems like Git (GitHub, GitLab, Google Source Repositories) and possess proficiency in design tools including Canva, and Figma.
- In summary, my diverse experience over the past years has equipped me with a robust skill set in front-end and back-end development, team leadership, and project management.

## CORE COMPETENCIES

Proficient in technology, leadership, problem-solving, continuous learning, Agile methodologies, and design skills.

**(4/5)** - WordPress, PHP, Laravel  
**(4/5)** - Tailwind, Bootstrap, MUI  
**(3/5)** - DB Design, MySQL  
**(3/5)** - GCP, AWS  
**(4/5)** - Git, GitHub

# MAJOR PROJECTS

## 1. Home Chef Service Management System

**Tech Stack:** React, Laravel, AWS

**Short Description:** An all-in-one solution for managing food orders, kitchen operations, chef schedules, and inventory tracking for Home Chef Services.

**Description:**

- Comprehensive management of food orders, kitchen operations, home chef schedules, and payment integration.
- Features user login, signup, and authentication.
- Customers can browse and order food from various home chefs with detailed profiles and menu listings.
- Home chefs can manage their schedules, accept or decline orders, and update their menus.
- Integrates with payment gateway for secure transactions.
- Hosted on AWS for scalability, reliability, and performance.
- Includes a comprehensive admin dashboard for monitoring activities, managing users, and generating reports.

## 2. Job Portal

**Tech Stack:** Angular, .net

**Short Description:** An online platform connecting job seekers with employers, featuring job listings, resume submission, and employer profiles.

**Description:**

- Connects job seekers with employers, offering job listings, resume submission, and employer profiles.
- Job seekers can create profiles, upload resumes, and apply for jobs directly through the portal.
- Employers can post job openings, manage applications, and browse candidate profiles with advanced search filters.
- Secure user authentication to protect data, with specific features accessible only to registered users.
- Supports various user roles with different permissions.
- Provides analytics and reporting tools for employers to track recruitment metrics.

## 3. Business Management System

**Tech Stack:** Angular, Laravel

**Short Description:** A versatile system for managing various aspects of a business, including inventory management, customer relationship management (CRM), and sales tracking.

**Description:**

- Handles incoming business requests from websites, task assignments, and tracks project progress with a detailed dashboard.
- Timesheet management for employees to log hours and submit timesheets for approval.
- Task and project management features for creating, assigning, and tracking tasks and subtasks.
- Inventory management for tracking stock levels, order history, and supplier information.
- CRM features for managing customer data, tracking interactions, and sales forecasting.
- Sales tracking tools to provide insights into sales performance and trends.
- Secure user authentication and role-based access control to protect sensitive data.

## 4. Learning Management System

**Tech Stack:** React, Laravel, GCP

**Short Description:** A comprehensive platform for managing online courses, student enrollment, instructor management, and course content delivery.

**Description:**

- Manages online courses and educational content.
- Features student enrollment, instructor management, and course content delivery.
- Students can enroll in courses, track progress, and take quizzes and exams.
- Instructors can create and manage courses, upload materials, and interact with students.

- Robust dashboard for monitoring student performance and course engagement.
- Test generator for creating quizzes, test taking sheets for students, and automatic result generation.
- Integrated email functionality for communication.
- Payment gateway integration for secure course purchases.
- Hosted on Google Cloud Platform (GCP) for scalability and reliability.

## 5. Mobile & Web App for Medicine Delivery

**Tech Stack:** Angular, Flutter, Laravel, Play Store

**Short Description:** A mobile (Flutter) G web (Angular) application enabling users to order and receive medicines from pharmacies, with prescription upload and delivery tracking.

**Description:**

- Enables users to order and receive medicines from the owner's pharmacy.
- Users can upload prescriptions, place orders, and track delivery status in real time.
- Includes features for user registration, login, and authentication for secure access.
- Pharmacy owners can manage inventory, process orders, and update delivery statuses from Web G mobile app.
- Mobile app developed using Flutter, available on the Play Store.
- Web application built with Angular, providing a responsive interface for desktop users (Admin only).
- Backend powered by Laravel for data management, order processing, and integration with third-party services for delivery tracking and payment processing.

## 6. A Finance & Investing Related Tech Blog

**Tech Stack:** Angular, Laravel

**Short Description:** A lightweight mini-WordPress-like CMS for managing blog posts, media, and users with user roles, comments, and analytics.

**Description:**

- Mini WordPress-like system for managing blog posts, media, and user roles.
- Comprehensive dashboard for administrators to manage content and users.
- Supports multiple roles such as subscribers, readers, and admins.
- Users can create and publish blog posts, upload media files, and interact with others through comments and likes.
- Features SEO optimization, social media sharing, and subscriptions.
- Secure user authentication with role-based access control for permissions management.
- Analytics and reporting tools for tracking blog performance and user engagement.

## 7. My Portfolio

**Tech Stack:** Next.js, Node.js

**Short Description:** This project showcases all my capabilities and provides detailed information about my professional background, skills, and projects.

**Description:**

- Showcases my capabilities, professional background, skills, and projects.
- Designed to highlight my expertise in various technologies, including frontend and backend development.
- Includes sections for biography, skills, project showcases, and contact information.
- Built with Next.js for a fast, SEO-friendly, and responsive user experience, ensuring easy navigation for visitors.
