

# SUNIL SAINI

Dynamic PHP developer with three years of experience, specializing in Laravel. Proficient in API integration and role-based systems, I am dedicated to applying my expertise to drive innovation in challenging projects. Committed to delivering high-quality solutions that enhance efficiency and functionality, contributing to the success of both the team and the organization.

## WORK EXPERIENCE

SAINI WEB SOLUTIONS, KOTA RAJ. 2021-2024

- Utilized Laravel framework: Achieved a 20% reduction in development time compared to previous projects, resulting in 80 hours saved per project.
- Developed site apps in Shopify, BigCommerce, PrestaShop, Wix to Increased customer sales by an average of 30% across all platforms.
- Ensured seamless data exchange by integrating databases and third-party APIs.
- Implemented CRM system, boosting customer interaction efficiency by 30%, resulting in a 20% increase in sales productivity.
- Engineered HRM system for streamlined employee management, Reduced employee management time by 50%.
- Mastered Flutter in four months and developed a dynamic stock market application: Garnered 10,000 downloads within the first month of release on both the Play Store and App Store, with an average user rating of 4.5 stars, resulting in a monthly revenue of \$10,000 from in-app purchases and ads.

## NOTABLE PROJECTS

- CRM (Customer Relationship Management) systems centralize customer data for businesses. They track interactions, manage leads, and automate sales tasks, enhancing customer relationships. As a Laravel developer, expertise in customization, API integration, and scalability ensures efficient CRM development. Prioritizing testing and maintenance ensures reliable solutions.
- Developed a country blocker application for Shopify, BigCommerce, and Wix platforms. This app restricts outsider users from accessing the website. Implemented frontend scripting using pure JavaScript and integrated it with Shopify stores using Laravel technology.
