## Profile Summary

As a Laravel Developer with a strong foundation in PHP, I specialize in crafting efficient and scalable web applications. My coding journey commenced at Gujarat Technological University, leading to a focus on Laravel. Committed to continuous learning, I'm advancing my API development skills and delving into Vue.js to augment my backend proficiency with front-end development.

## Work Experience

### Web Developer

Octanics Software

03/2022 - 04/2023

- Managed the development of the ERP project, TurboBusiness, with a focus on sales, CRM, SCM, finance & accounting, and KPI modules.
- Spearheaded the creation of the Point of Sale (POS) module from inception, incorporating key functionalities such as PDF generation, email integration, and bulk data upload using Excel files.

### Web Developer

WebPatriot

12/2023 - Present

- Communicated with client on a daily basis to understand their requirements for their ERP project, the Hajiri app, utilized at construction sites.
- Developed modules including Product Material, Product Issue, Worker Class, and Leave Management for the construction workers and contractors.
- Created APIs for Leave Management to streamline

the process and enhance efficiency.

- Worked on desktop notifications, generated PDFs and Excel sheets, facilitated bulk uploads, and implemented email notifications to ensure seamless functionalities.
