## PROJECTS

---

### Multi-Area Parking Using Deep Learning.

- Built a deep learning-based system to detect empty parking spaces from real-world images.
- Visualized available slots using bounding boxes and displayed total empty counts.
- Applied preprocessing and optimization for efficient performance.

### Hiding Text in the Image Using LSB .

- Developed a steganography-based system to embed secret text data (e.g., satellite info, designs) into image files using the Least Significant Bit (LSB) technique in Java.
- Ensured both secure data embedding and accurate extraction, while keeping images visually unchanged.
- Focused on secure communication and data confidentiality.
