PAVAN BELDAR

PHP Developer

8459404556   pawankumavat7773@gmail.com   Pimpri chinchwad

Summary

Backend Developer with over 1 year of experience at Appzia Technologies, adept in PHP, CodeIgniter, MySQL, SQL,   JavaScript, jQuery, Node.js, Express.js, MongoDB, HTML, CSS, and Bootstrap. Possesses a versatile skill set, excelling in both Node.js and PHP environments. Proven ability to architect, develop, and maintain robust backend systems while ensuring seamless integration with frontend components. Dedicated to contributing expertise to innovative projects and leveraging comprehensive knowledge to drive impactful solutions. Seeking opportunities to apply dual proficiency in Node.js and PHP to tackle diverse challenges and deliver exceptional results in dynamic environments.

Experience

Appzia Technologies   Pune, Viman Nagar

Backend Developer   04/2023 - Present

- Developed and maintained backend systems for Gaming , Web Application, Applications, and web panels.
- Collaborated with frontend developers to integrate user-facing elements with server-side logic.
- Implemented RESTful APIs using the CodeIgniter framework in PHP and Express.js in Node.js. Designed and managed databases using MongoDB and MySQL.
- Utilized PHP with CodeIgniter and Node.js with Express for server-side scripting and web application development.
- Ensured high performance and responsiveness of applications.
- Conducted code reviews and provided constructive feedback to team members.
- Resolved technical issues and optimized application performance.

Education

B.Tech in Electronics and Telecommunication Engineering   Shirpur, Dhule

R. C. Patel Institute of Technology | CGPA: 7.89 / 10.0   08/2019 - 06/2023

H. S. C   Pimpalgaon Hareshwar

MAHARASHTRA STATE BOARD | Percentage : 62.77   06/2018 - 03/2019

S.S.C   Bhoje

MAHARASHTRA STATE BOARD | Percentage : 82.20   07/2016 - 03/2017

Skills

Programming Languages : **PHP, JavaScript, SQL**

Frameworks/Libraries : **Node.js, Express.js, jQuery CodeIgniter**

Databases : **MySql, MongoDB**

Web Technologies: **HTML, CSS, Bootstrap**

Projects

Unicircle - College Application

Roll – PHP developer

Unicircle is a comprehensive platform designed to enhance the collegiate experience, providing students, faculty, and administrators with a centralized hub for campus activities. With features such as personalized profiles, interactive feeds, a marketplace, Q&A forums, a noticeboard, academic tools, messaging, events, and job listings, Unicircle fosters communication and collaboration within the academic community. Administrators benefit from robust admin panels for system-wide and campus-specific management. Built on PHP with CodeIgniter and MySQL, Unicircle prioritizes scalability, performance, and security, ensuring a seamless user experience. It redefines campus engagement, fostering a connected and inclusive environment for learning and networking.

Chess - Gaming Application

Roll - PHP developer

The Chess Collaborative Platform is a groundbreaking endeavor that seamlessly integrates with Unity game development and admin panels powered by CodeIgniter. With a focus on versatility and engagement, it offers players a diverse range of chess experiences, including solo mode, friend mode, tournaments, and the unique Chess 960 variant. Powered by PHP with CodeIgniter and MySQL, the backend infrastructure ensures swift and secure gameplay experiences across all modes. Collaboration with Unity game developers enriches the gaming experience. This project not only redefines chess gaming but also exemplifies the potential of collaborative development in creating innovative and immersive gaming ecosystems.

Junner Aggrofresh - E-commerce Application

Roll – PHP developer

Junner Agrofresh is an innovative e-commerce platform designed for the agricultural sector, enabling direct sales of farm-fresh fruits, vegetables, and produce. Powered by PHP CodeIgniter, MySQL, AJAX, JavaScript, HTML, CSS, and jQuery, the backend ensures seamless management of inventory, orders, and user accounts. This platform streamlines buying and selling, enhances transparency, and boosts efficiency in agricultural commerce. The integrated website offers a user-friendly interface for browsing, purchasing, and tracking orders. Junner Agrofresh bridges the gap between farmers and consumers, delivering unmatched freshness and quality from farm to table.

Adbaba – Advertisement Application

Roll – PHP developer

Adbaba transforms advertising with a comprehensive platform that integrates user applications and an intuitive admin panel. Developed a robust backend using PHP CodeIgniter, MySQL, AJAX, JavaScript, HTML, CSS, and jQuery. Users can easily create and manage ads, specifying images, banners, text, duration, time slot, location, and LED type, with transparent billing based on selected parameters. The admin panel allows seamless management of ads, user accounts, billing, and scheduling. Adbaba offers an efficient interface for advertisers, revolutionizing ad creation, management, and display in the digital advertising space.

7Fife - Music Application

Roll - Nodejs Backend developer

7FIFE is a dynamic music application that harmonizes backend infrastructure with user experience. As the backend developer, Implemented extensive features like song, artist, album, and category management using Node.js, MongoDB, and Express. The platform integrates with the Spotify API, offering a vast library of tracks and enhancing user engagement. The backend supports adding new releases, curating playlists, and seamless data handling, ensuring efficient communication between the admin panel and the app. 7FIFE delivers an immersive and intuitive music discovery experience through meticulous backend development.
