Krishan Science School, Surat

PROJECTS

HOLYREADS
The purpose of developing this app is to provides people ability to read book anytime and anywhere. We have implemented this app from scratch & added functionalities like social media login, audio player, video player and download the videos so that user can watch videos anytime without internet.

DOXBOX
This app is mostly like Digi-locker app. We have implemented both mobile & webapp. In this app we have implemented documents upload features with dynamic field displayed for documents verification and save in this app. Also designed UI as per the document type e.g. Driving License, Passport, Birth Certificate etc. Also this app has functionalities like localization, download uploaded documents and also user can share profile with the help of QR code.
