EXPERIENCE

LARAVEL DEVELOPER - Enjay-IT Solutions Ltd

2022 - Present
Specializing in the development of a CRM system designed to efficiently manage various aspects of business operations.
My responsibilities involve designing, implementing, and maintaining features that enhance the functionality and user experience of the CRM.

KEY RESPONSIBILITIES

- Inbound Email Integration
- Data Import
- Marketplace Integration
- Roll Up Sums

PROJECT EXPERIENCE

Auto Distribution

2023 Jan - Feb

- When a record is generated in CRM from different sources such as Inbound Emails, CRM API integration, or Marketplaces like Indiamart, Just Dial, and TradeIndia, It may either be assigned to a single user or left unassigned.
- As a result, team leaders or admins have to manually assign these records to team members.To simplify this process.
- we have developed an Auto Distribution feature that automate the assignment of records to team members.
- Instead of burdening admins or team leaders with manual assignments, this feature intelligently distributes records.
- Optimizing the workflow and reducing workload.
