EXPERIENCE

UI-UX Designer   02/2023 - 05/2024
Doccine Pvt Ltd.   Surat, India

- **Onboarding flow:** Revamped the onboarding flow, reducing the time from 20-30 minutes to 5 minutes by streamlining the process. Now, users can onboard themselves without team assistance.
- **Doccine university:** Designed an internal learning platform empowering users to independently navigate the software, reducing manual explanations. Resulted in a 50 percent decrease in sales team training time.
- **Mobile application:** Conducted qualitative research revealing that 40% of receptionists desired a mobile version of our software, In response, led the design of a simplified mobile version, prioritizing key features such as appointment booking, management, billing, document upload etc.
- **Worked closely with cross-functional teams,** including developers and stakeholders, to ensure seamless integration of designs into the software development process, resulting in a 1.5x acceleration of the development timeline.

UI-UX Designer   02/2022 - 02/2023
INC DESIGN Agency LLP   Ahmedabad, India

- **Proficient in translating client requirements** or wireframes into captivating and user-friendly UI/UX designs using tools such as Figma and Illustrator. Applied expertise to drive a 20 percent increase in user engagement.
- **In a short timeframe,** successfully contributed to over 10+ projects and collaborated with 3+ startups, working closely with stakeholders and internal teams to enhance their digital presence and elevate user experience across software and websites.

UI Designer & Developer   05/2020 - 11/2020
Microstrake   Boisar (MH), India

- **Crafted our startup's website,** making it user-friendly and cohesive with our brand, Led design for 3+ projects, including websites and apps to solve user problems, Implemented solutions for better user engagement.

PROJECTS

Bsc(CS) Mobile App   04/2019 - Present

- **Designed and developed a BSc CS app** providing affordable access to textbooks, enabling students to study conveniently on their mobile devices. This app provided access to all necessary content, aiding over 100+ users in their educational journey.
- **Enhanced user experience** by incorporating features such as access to previous years' question papers and syllabus, addressing common challenges in accessing educational resources.
- **Achieved over 1200+ downloads** on the Google Play Store and garnered 30+ positive user feedbacks within a few months.

PetCare Mobile App   01/2022 - 01/2022

- **PetCare, a mobile application** enabling around 10000+ pet owners in our city to easily schedule appointments for their pets with nearby veterinarians.
- **Created a user-friendly interface,** PetCare streamlines the appointment booking process and offers 3+ features to enhance user experience.
