Job Title: Business Analyst (Entry Level – Energy Domain)

Experience: 0–1 Years

Location: Pune

Education: MCA

Cut Off Criteria: First Class or better throughout (>60% from 10th onwards)

Employment Type: Full-time

Domain: Energy, Utilities, Power, Renewable, or Retail Energy (Electricity/Gas)

Methodology: Agile / Scrum

Role Summary:

We are looking for a motivated entry-level Business Analyst to support business and technical teams in the energy domain. The candidate will participate in requirement gathering, documentation, business process analysis, and coordination between stakeholders and development teams using Agile methodologies.

Key Responsibilities:

- Collaborate with stakeholders to understand business processes, user needs, and solution requirements.
 - Assist in capturing, documenting, and refining requirements (BRD, FRD, User Stories, Use Cases).
 - Participate in Agile ceremonies (Daily Stand-ups, Sprint Planning, Grooming, Retrospective).
 - Perform data analysis and support in preparing reports, dashboards, and insights.
 - Contribute to process mapping, workflow diagrams, and impact analysis.
 - Work closely with product owners, QA, and development teams to ensure requirement clarity.
 - Support functional testing, UAT coordination, and defect tracking.
 - Prepare meeting notes, presentations, and status reports for stakeholders.
 - Learn and apply energy industry processes such as metering, billing, settlements, tariffs, customer onboarding, and service requests.
-
